→ **EVS GUARDS IS A DYNAMIC AND PROFESSIONAL COMPANY, DEDICATED TO**

providing comprehensive and fully integrated security services to clients in the commercial, industrial and domestic markets. EVS Guards is a major supplier of site security services to the construction industry, and with construction security comprising approximately 70% of their commitments, they are experts in the field.

EVS Guards are proud to be the provider of construction security services to Abigroup for Stage One of the Pacific Square project at Maroubra.

EVS Guards provide a variety of security services including, but not limited to static guards (available both day and night), guard dogs, mobile patrols, security systems, and alarm responses linked to a central monitoring room with response teams providing 24 hour support. Portable alarm and radio systems are attached to site perimeter fences and at high risk areas to provide specialised protection from disturbances.

In addition to their security technology and services, EVS Guards use efficient recording systems for all their services. Log report books are kept on site for recording disturbances, regular activities, and any additional details required by clients. Security reports detail all disturbances on the premises. Supervisory patrol persons conduct checkup patrols to ensure that site guards are performing their duties to the mutual satisfaction of EVS Guards and their clients. EVS Guards also provide construction specific services such as traffic controllers, lift/hoist operators and first aiders.

EVS Guards use a specialist technology called the Touch Guard Tracking System, utilised for the Pacific Square project at Maroubra. Microchip powered buttons, the size of five cent pieces, are installed throughout the site and each programmed with the details of their own location.

Guards activate the buttons with special batons, and the details of this activation are recorded to EVS Guards' computer system. This information is then included in full weekly reports.

The Touch Guard Tracking System provides an assurance of the quality of EVS Guards' services, as every detail of their guards' routine patrols is available, ensuring that guards are always performing to the client's satisfaction.

EVS Guards employ a large reservoir of licensed professionals. All guards are fully trained, with skills and qualifications regularly updated by a registered training organisation working privately with EVS Guards. Guard training includes 1A, 1B and 1C security licence courses, first aid schooling, handcuffs and baton training, self defense courses, firearms training and guard dog handling courses.

EVS Guards' staff are fully equipped with wet weather clothing, radios, mobile phones, security belt, torch, baton, padlocks and full uniform designed according to client specifications.

EVS Guards provide these fully trained staff providing premium security services, at the lowest prices. All charges are based on a flat rate per hour policy, a rate that remains the same during weekends and public holidays. This hourly flat rate includes overtime, wage loading, workers compensation, sick leave and annual leave.

EVS Guards is owned and operated by fully trained and licensed professionals whose approach to staff qualifications, trustworthiness and client service is to demand the highest of presentation and performance standards.

EVS Guards have recently supplied security services to Abigroup Ltd for Liverpool Bus Station and Hillsong

Business Park; to Barclay Mowlem Construction for North Ryde Business Park at Talavera Rd and Botanic Cove in Gladesville; to Bovis Lend Lease for Camellia Warehouse and Bennelong Rd in Homebush Bay; to John Holland Construction for Eastern Creek Dragway and CSIRO in North Ryde; to Southern Cross Construction for Coral Resort at The Entrance and Greensquare Oasis Development in Waterloo; to St. Hilliers Contractors for Kings Bay Estate in Five Dock and Hunterford Estate in Oatlands.
