

GWA CONSULTANTS AUSTRALIA PTY LTD

FOR THE RESIDENTS OF THE PORT MACQUARIE NURSING HOME, comfort is an important consideration. Comfort is a state of physical ease or wellbeing. GWA Consultants Australia Pty Ltd worked hard to deliver comfort to the residents of the facility through their design of the air conditioning and ventilation systems.

Consideration of noise levels was also essential in providing the required level of comfort.

GWA Consultants Australia Pty Ltd are Consulting Engineers specialising in the design of air conditioning and ventilation services and provided the design and documentation of these services for this facility. Quality control of the services installation was also undertaken by GWA Consultants Australia Pty Ltd by way of regular site inspections of the installation works. The installation was carried out by Attack Air Conditioning Pty Ltd of Newcastle.

The design and documentation for the project was carried out by Mr Henry Kleinman in conjunction with Mr Dalton Veitch, both Senior Engineers in the GWA Consultants Australia Pty Ltd organisation.

The principals and staff of GWA Consultants have extensive experience in the building industry and can service your needs by utilising their expertise in mechanical services design. The types of projects undertaken by GWA Consultants Australia Pty Ltd include, new commercial and institutional projects, refurbishment and tenancy fitout works, main chiller and DX plant refurbishment and upgrades, dealing rooms and financial institution fitouts, data centres and computer rooms, building monitoring and control systems, maintenance and building audits, and QA overview of both design and construction. GWA Consultants Australia Pty Ltd offer an extensive consultancy service, with personalised service from one of the principals or senior engineers.
