

DARLEY ALUMINIUM COLLABORATES WITH STYLE WINDOWS AT PETERSHAM RSL AND THE SIDING PETERSHAM

Darley Aluminium, an Australian-owned family business, is more than just one of Australia's largest distributors of aluminium extrusions.

NSW fabricator, Style Windows were looking for an aluminium systems provider that could do everything from the sliding doors, framing, and multi-fold doors for the Petersham RSL and the Siding Petersham project. More importantly, Style Windows was looking for modern and stylish door and framing systems that would complement the apartment's minimalist aesthetic and to source windows tested and designed for the Australian climate.

Darley's CityView range of commercial systems ticked all the boxes in being able to meet all the project performance specifications, including AS2047, energy and acoustic requirements.

Providing high performance, versatility, and design flexibility, the CityView range of commercial windows and doors seamlessly integrates into the aesthetic of any commercial project. This system can be incorporated into a variety of louvre, awning, double-hung, sliding, and multi-fold configurations by using a common framing system, which allows for a wide range of design options. Suitable for a range of architectural and commercial

applications, the durable CityView range has been designed and engineered in Australia to withstand the harsh Australian climate and conditions.

"We chose the Darley Commercial Systems, including Architectural Apartment Sliding Doors, CityView Awning Windows, 100mm & 150mm Front & Centre Glazed Framing and Harbourview Bifold Doors for our Petersham RSL and Siding project as these systems met the required design and performance specifications for this project including using single- and double-glazed glass throughout," said Norm from Style Windows.

The CityView Architectural Sliding doors were installed in the apartments to extend the living space into the private balcony area, with the sliding door increasing the inflow of natural light and perfectly complimenting the louvre windows on the balcony. With an acoustic rating of 35 Rw, The CityView Architectural sliding door offers noise reduction to the closely situated Petersham train station.

The vision for the front entrance of the RSL front entrance was to be a spacious and impactful entrance for its many patrons. This was achieved by installing the 100mm and 150mm front single-glazed commercial

framing systems chosen for their high strength, durability, and ability to support the revolving door, creating a seamless flow from outside to inside.

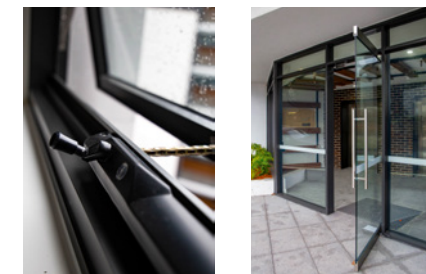

With a long-standing, highly regarded reputation in the aluminium industry, Darley has been servicing the needs of fabricators Australia-wide for over 25 years with complete customised solutions of their expert product range.

Offering over 1,000 aluminium extrusions, Darley window and door systems have been designed and engineered in Australia and meet and exceed current Australian Standards, providing comfort, durability and exceptional performance to suit specifications of any project type.

With four branches nationwide, Darley has been designing and distributing window and door systems that offer superior performance and style for residential, commercial and industrial applications.

Offering customers more than just aluminium extrusions to produce a window or door, Darley provides the complete solution. This includes technical manuals to assemble the system, software that creates the quotes and estimates, an ICS team that provides quality customer service and technical support to help fabricate and install the system.

Darley prides itself on being a one-stop location for all things aluminium and provides high-quality products and high levels of customer service and support. No matter how large or small the project, Darley can take care of all your aluminium window and door needs and provide the complete solution.
