STRENGTH IN EVERY LAYER

Locally owned and operated CPS Concrete Group has been in operation for over 40 years, growing excellent working relationships with many large builders in Canberra across commercial, large scale, and high profile developments.

CPS Concrete Group evolved from the family run business, CPS Concreters, established in 1990. Managing Director, Tony Costanzo and his family have grown alongside the company with Director Joe Bencich who manages the concrete pumping side of the business.

“The CPS Concrete Group is Canberra’s leading structure specialist. Offering concrete, reinforcement and post tension services in house, CPS Concrete, deliver complete packages to builders throughout Canberra and New South Wales,” Tony said. “We have been involved in numerous high-profile projects, fostering strong relationships with leading builders, including being involved in most of Canberra’s tallest buildings.”

CPS Concrete Group stands out for its unwavering commitment to delivering top-tier concrete products and services, backed by a highly skilled and experienced workforce. Known for tackling complex design challenges with innovative solutions, the company consistently exceeds expectations in both commercial and residential projects. By strategically expanding its team with professionals who possess

local expertise and specialised skills, CPS Concrete Group ensures that every project is completed to the highest standards. Equipped with state-of-the-art machinery, they are fully prepared to handle tasks of any scale, reinforcing their reputation as a trusted leader in the industry.

“We maintain a comprehensive range of equipment, ensuring that all machinery is serviced to manufacturer specifications and meets all relevant legislative standards. Our operators are fully trained to safely and efficiently use our equipment, with a strong emphasis on safety protocols,” added Tony.

Expanding CPS Concrete Group’s services has enabled the company to manage projects from start to finish, including reinforcement installation, concrete placement, and post tensioning services. “From tying steel of the first pad footing to final stress of suspended slabs, CPS can find a solution that works for all of our clients” said Tony.

OZZ CRETE: LAYING THE FOUNDATIONS FOR CONCRETE SOLUTIONS

Since 2009, OZZ CRETE has firmly positioned itself as a trusted leader in concrete construction throughout southeast Queensland. For over 15 years, this Australian family-owned company has delivered a dynamic range of concrete solutions tailored to meet the diverse needs of residential, commercial, industrial, and civil projects.

Whether it's a bespoke high-end residential build or a large-scale civil infrastructure project, OZZ CRETE's commitment to quality, flexibility, and client collaboration ensures every job is executed with precision and excellence.

A Comprehensive Approach to Concrete Construction

OZZ CRETE's comprehensive service model sets it apart in the industry. By offering a one-stop-shop for concrete solutions, including all aspects Steel fixing, formwork and concreting, the company streamlines the construction process from design and procurement to project handover.

Managing Director Joe O'Brien, emphasises the importance of this approach, stating, "Our clients value the peace of mind that comes with knowing they have a single point of contact throughout the entire project lifecycle. This not only simplifies communication but also ensures consistency in quality and delivery."

The company's expertise spans various concrete applications, including residential concrete footpaths and driveways, commercial road pavements, and intricate civil stormwater and drainage structures.

OZZ CRETE's portfolio is diverse, encompassing everything from the construction of cast in-situ concrete retaining walls and gully pits to the installation of large reinforced concrete box culverts and decorative finishes that elevate the aesthetic appeal of any project.

Tailored Solutions for Every Project

At the core of OZZ CRETE's operations is its ability to adapt to the unique requirements of each project.

"No job is too big or small for us. We work closely with our clients to understand their specific needs and deliver concrete solutions that not only meet but exceed their expectations. Whether it's high-flow or low-flow concrete, our team ensures the right mix is used to achieve the best results," explained Operations Manager, Tanu Wulf.

This flexibility is particularly evident in OZZ CRETE's work across southeast Queensland, including projects in the Northern Rivers, Toowoomba, and the Noosa Sunshine Coast Hinterland. The company's ability to deliver high-end architectural finishes and custom concrete structures has earned it a reputation for excellence in the region's most demanding construction environments.

Expertise and Experience You Can Trust

With over 15 years of industry experience, OZZ CRETE has cultivated a team of highly skilled professionals, including formwork carpenters, steel fixers, and in-house engineers.

"Our team's collective experience and dedication are what make us stand out. Each member brings a wealth of knowledge to the table, ensuring that every project is completed to the highest

standard, on time, and within budget," highlighted Project Manager, Jake O'Brien.

OZZ CRETE's commitment to excellence is further reinforced by its proactive approach to customer satisfaction. Regular communication with clients is a cornerstone of the company's operations, with senior management personally overseeing each project to ensure superior quality and a seamless construction experience.

Building Long-Lasting Partnerships

Beyond its technical capabilities, OZZ CRETE is deeply committed to fostering long-lasting relationships with its clients. The company's collaborative approach has led to ongoing partnerships across various sectors, from residential developments to large-scale civil infrastructure projects. "Our success is built on the trust and loyalty of our clients. We don't just complete projects; we build relationships that last," said engineer, Andre De Villiers.

OZZ CRETE's dedication to client satisfaction is reflected in the company's impressive track record of delivering projects on time and within budget. This reliability, combined with a dynamic and agile operational model, positions OZZ CRETE as a leader in the concrete construction industry.

LANDMARK PROJECTS AND INNOVATIONS IN PRECAST CONCRETE

Operating since 1948, SVC Products is an ISO-accredited Victorian manufacturer of high quality, industry-compliant precast concrete products made to suit multiple applications across civil and landscape construction.

SVC's unique approach to precast concrete was recently showcased in Mirvac's Liv Aston building project in Melbourne's Northbank precinct. The team manufactured and supplied 78 large-format precast concrete planters for the building's façade, each weighing about 5 tonnes. This project, which amounted to 390 tonnes of precast concrete, is yet another demonstration of their expertise in handling large-scale projects.

The manufacturing process for these planters began in late 2022, with deliveries completed by mid-2023. SVC faced significant challenges, including labour shortages due to COVID-19 and necessary design adjustments to meet weight constraints. Despite these hurdles, SVC re-engineered the planters to be lighter, with each floor featuring three smaller units installed side-by-side.

This project highlights SVC's capability to innovate and adapt. Despite the complexity and typical use of precast products at ground

level, SVC successfully produced precast units that were feasible for installation on a high-rise building, demonstrating their proficiency in precast concrete fabrication.

Beyond Liv Aston, SVC's portfolio includes high-rise projects like the Aurora Melbourne Central and Shadow Play apartment towers. SVC supports various infrastructure projects, and are currently working on bespoke signage for ANZAC Station, outdoor furniture for Parkdale Secondary College, and bollards for Luna Park and the Shrine of Remembrance.

SVC is a leader in precast concrete manufacturing and is committed to delivering high-quality, innovative solutions. Specialising in precast concrete fabrication, SVC offers both standard and custom-made products tailored to meet unique project requirements. Their experienced team provides dedicated customer support throughout the design-to-delivery process, ensuring final product solutions satisfy all project criteria for quality, performance and durability.

For more information contact SVC Products Pty Ltd, 38 Japaddy Street, Mordialloc VIC 3195, phone 1300 287 782, email sales@svc.com.au, website www.svc.com.au

EIFERS USES LOW-CARBON CONCRETE AT MELBOURNE AIRPORT'S UBER TERMINAL

Eifers, the family-owned time-critical civil construction company, continues to cement its reputation as a premier contractor at Melbourne Airport with its latest project: the construction of the Uber Terminal at Terminal 4.

Eifers delivered a range of critical tasks, including canopy and foundation installation, guttering and downpipes, footpath and ramp design and construction, mechanical ventilation HDPE pipe installation, public lighting installation, bollard installation, and the relocation of hydrants, water meters, and fire hose reels. Additionally, landscaping works are being undertaken to enhance the aesthetic appeal of the site.

One of the most impactful features of this project is the installation of 472m² of footpath and canopy. The project, which commenced in May 2024 and is expected to be completed by August 2024, involves 12 key staff members from Eifers.

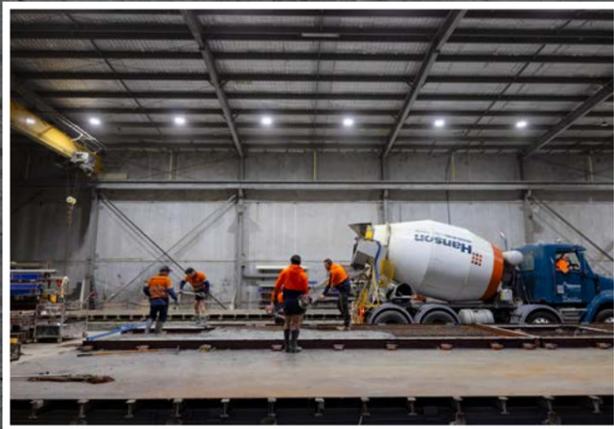

Despite the challenges posed by the area's high visibility, passenger traffic, and the relocation of numerous in-ground services, Eifers has managed to maintain progress thanks to innovative methods and products.

The offsite prefabricated structure from Stoddart Infrastructure has accelerated the construction program for Eifers, while the use of Adbri's low-carbon concrete Futurecrete has reduced CO₂ emissions by 23.8 tonnes.

Eifers' ongoing projects also include maintenance and repairs at Melbourne Airport, Werribee River Park, and the Frankston Flinders Road widening. With a proven track record of delivering time-critical works using High Early Strength Concrete, Eifers is recognised as the go-to concrete contractor for Melbourne Airport.

Eifers is a family-owned Australian company with an agile and innovative approach to civil construction. Founded by the Eifermann family in 2003 as a small business, Eifers has grown to be a leading and trusted name within the civil construction and critical infrastructure works spaces.

For more information contact Eifers Civil Pty Ltd, 13 Newmarket Lane, Epping VIC 3076, phone 03 9357 6360, email admin@eifers.com.au, website www.eifers.com.au

GBG CONCRETE CONSTRUCTION: A LEGACY OF EXCELLENCE IN CIVIL CONSTRUCTION

In the heart of Victoria, GBG Concrete & Construction stands as a beacon of excellence, carrying forward a rich 70-year legacy. As a family-owned and operated business, GBG has transformed from its roots in domestic and commercial concrete works into a leader in civil construction, in-situ and precast concrete products. Their transformation has enabled them to undertake large-scale in-situ and precast projects throughout Victoria.

The company's commitment to quality and innovation is showcased in its state-of-the-art facilities in Sale. These include a sprawling precast factory measuring 230m in length and 20m in width, which ensures uninterrupted operations regardless of weather conditions.

GBG Concrete & Construction prides itself on producing a diverse range of precast concrete products. From pits, sleepers, and footings to barriers, wall panels, and columns, their offerings are delivered across Victoria and beyond. The company specialises in coloured, polished, and exposed aggregate finishes, ensuring that every project is completed to the highest standards.

Their comprehensive service includes supplying and installing all precast elements, covering design, detailing, fabrication, transport,

and erection. This holistic approach eliminates the need for additional subcontractors, ensuring projects are completed on time and within budget.

GBG's fleet of prime movers, trailers, transport frames, and a super layover frame capable of transporting panels up to 4.6m wide provides exceptional flexibility and control over deliveries. This capability allows the company to reliably meet project schedules, no matter the scale or complexity.

Specialising in civil and concrete construction services for commercial and industrial projects on both greenfield and brownfield sites, GBG boasts extensive experience in live major hazard facilities. Their highly skilled workforce, including carpenters, plant operators, steel fixers, and labourers, brings a wealth of industry expertise to every project. This dedication to craftsmanship and safety ensures that GBG not only meets but exceeds client expectations.

For more information contact GBG Concrete & Construction, 339 Raglan Street, Sale VIC 3850, phone 03 5144 2913, email info@gbg.com.au, website www.gbg.com.au

REVOLUTIONISING CONSTRUCTION WITH CUTTING-EDGE TECHNOLOGY

In the dynamic construction world, Azzurri Concrete stands as a leader in the concrete industry, exemplifying precision and excellence.

Azzurri played a crucial role in the construction of a \$1 billion warehouse precinct by Fraser Property Industrial, Aware Super, and Altis Partners. They contributed their expertise to the impressive 110,000m² single-floor plate, the largest of its kind in New South Wales.

Azzurri was responsible for supplying, placing, and pumping all the concrete, tasks that required precise execution and a partnership with Western Suburbs Concrete for specialised mix designs.

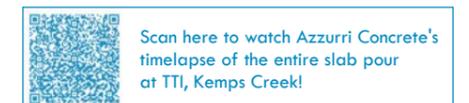

Additionally, Azzurri handled pad footing excavation, reinforcement, sand, structural steel hold-down bolt installation, and fire tank piling works, demonstrating their versatility and industry leadership.

The project's technical demands, particularly the requirement for an exceptionally flat floor, were met with Azzurri's innovative approach and investment in advanced equipment. They strategically added state-of-the-art machinery to their fleet, including Riding Trowels from Allen in the USA, and Boom Laser Screeds from Somero Enterprises.

This cutting-edge equipment, combined with the expertise of their highly skilled team, ensured remarkable flatness results without the need for corrective grinding across the entire 110,000m² of slabs.

Despite the heavy season of rainfall and COVID-19 challenges, Azzurri's team demonstrated resilience and efficiency, completing their work by July 2023. This project is a testament to Azzurri's capability to navigate adversities while maintaining high standards of quality and efficiency.

At the project's peak, Azzurri had 120 staff and 70 subcontractors on site, working tirelessly to meet deadlines and deliver superior results. Their innovative approach, commitment to excellence, and strategic management have set a new benchmark in construction.

For more information contact Azzurri Concrete, 5 Frank Street, Wetherill Park NSW 2164, phone 1300 299 877, email info@azzurriconcrete.com.au, website www.azzurriconcrete.com.au
